

Blockage Not Required

Fidelis Solution Facilitates Safe Usage of Social Networking Sites

Social networking can help firms grow their businesses. But its popularity also has prompted security concerns, including the unauthorized transmission of critical business data.

Nevertheless, firms don't have to completely block social networking sites to stay safe. With the new version of data leakage prevention solution Fidelis XPS from Fidelis Security Systems, companies can monitor and even block the transmission of data within specific social marketing applications.

The latest version of the Fidelis Extrusion Prevention System, Fidelis XPS provides controls to understand both the content and context of information posted to social network applications.

With support for Facebook, LinkedIn, MySpace, Plaxo, Twitter, Orkut, Friendster, Hi5, Ning and Badoo, Fidelis XPS allows legitimate business to flow freely through approved channels – including social networks – while potentially risky behaviors are detected and remediated.

Secure File Access

Rocket Matter Adds Storage Functionality

Rocket Matter, which offers a Web-based legal practice management and time and billing solution for small- to mid-sized law firms, now offers document storage in its signature Rocket Matter product.

The new tool – which is part of the Rocket Matter Web-based SaaS (Software-as-a-Service) product – allows users to easily organize their files via a secure mechanism for massive data storage. Files of up to 2 MB saved in traditional office formats such as Word, WordPerfect and Excel can be organized by matter number and by tag.

Rocket Matter enables law firms to have a practice management solution without having to purchase, install and support all of the required hardware and software. Users can use the program from any location with just an Internet connection.

For more information, visit www.rocketmatter.com.

Operations Assistance

Upgraded ADERANT Software Delivers Advanced Functionality

Business and financial management software provider ADERANT has introduced ADERANT Expert "Golden Gate" Release, the next-generation version of its ADERANT Expert suite of integrated applications.

The new version – designed to help firms create consistency, improve efficiency and streamline and automate critical business processes – includes a service-oriented architecture and advanced functionality that leverages Microsoft's workflow technology platform, Windows Workflow Foundation.

The "Golden Gate" Release includes Expert File Opening, a workflow-enabled application that helps law firms to automate their client and matter intake business processes, and a new intuitive time entry component that allows users to capture time even when they are disconnected from their firms' networks or are offline.

For more information, visit www.aderant.com.

Practice Partner

Elite Enterprise Clients Gain Access to Clarity's Financial Reporting Solution

Elite – which provides integrated practice and financial management systems and is part of Thomson Reuters – and corporate performance management solutions provider Clarity Systems have announced the integration of the Clarity 6 financial reporting and consolidation solution in the Elite Enterprise brand.

Elite Enterprise clients now can have immediate access to the Clarity 6 software suite and will experience a seamless transition from Elite Enterprise to 3E, a next-generation financial and practice management software system.

Elite and Clarity's partnership began in 2006 when Clarity's budgeting functionality was introduced into the Enterprise platform and expanded with the new Elite 3E brand in June 2008.

For more information, visit www.elite.com or www.claritysystems.com.

Centralized Processes

Discovery WorkFlow Automates Steps in Electronic and Paper Discovery

Technology Concepts & Design Inc. has released Discovery WorkFlow, designed to help automate the steps involved in processing electronic and paper discovery.

Discovery WorkFlow is a centralized workflow definition and control interface capable of automating the launch of processes and resources while providing complete tracking, improved efficiency, reduced manpower requirements and reduced costs.

Discovery WorkFlow works with virtually any e-discovery processing software and can automate processes such as metadata extraction, file de-duplication and record filtering.

For more information, visit www.tcdi.com.

THE TECH 10

- 1 Legal support service and document outsourcing provider **Document Technologies Inc. (DTI)** announced the addition of kCura's Relativity Web-based document review and management solution to its collection of electronic discovery offerings. www.dti-global.com
- 2 IP communications solutions provider **Proximiti Communications Inc.** announced an extension to its WorkTRAKR service – which creates a real-time communications log for each user, itemizing phone calls and e-mails from office and mobile environments — that will enable real-time entry of fee records into Tabs3 billing systems. www.proximiti.com

- 10 Data leakage prevention provider **Digital Confidence** has released Hidden Data Detector, a free tool to find and identify hidden data and metadata in files. www.digitalconfidence.com

Modern Meetings

Canson Launches Interactive Digital Communications Tool

Art paper manufacturer and supplier Canson has launched Papershow, an innovative presentation and brainstorming product.

Designed to make meetings more fun and engaging for participants, Papershow is an interactive paper and Bluetooth pen system used for digital communication and presentation applications. Users can create perfect shapes and lines with varying degrees of thickness and colors and can export Papershow drawings into PowerPoint documents and quickly make comments or changes to presentation images. All presentation modifications and meeting notes can be saved and e-mailed to meeting participants.

Papershow's plug-and-play technology is compatible with PCs installed with Windows XP Service Pack 2 (SP2) or Windows Vista.

For more information, or to purchase Papershow, visit www.papershow.com.

Accounts Receivable

Tab3 Authorization Module Allows Firms to Accept Clients' Credit Card Payments

Software Technology Inc., maker of Tab3 Billing and Financial Software and PracticeMaster Practice Management Software, has released its new Tab3 Credit Card Authorization Module.

The Payment Card Industry Security Standards Council has reviewed and accepted the new module, which is now available for all Tab3 Version 15 users.

Tab3 is working with First National Merchant Solutions (FNMS), one of the United States' largest payment processors, to provide merchant accounts to Tab3 users. Tab3 clients can receive special negotiated rates that are as low as 1.42 percent. Firms can now process Visa, MasterCard, Discover, American Express and Diners Club payments from their clients – having the money from their FNMS merchant account deposited directly into their existing bank accounts — using the new module.

For more information, visit www.tab3.com.

Connecting the Dots

New Version of LexisNexis TextMap 5 Links Transcripts, Video Depositions

LexisNexis, a provider of content-enabled workflow solutions for the legal profession, recently released TextMap 5, a new version of its transcript management tool.

Designed to be affordable and easy to use, TextMap 5 automatically links transcripts to key case exhibits, eliminating the need for separate linking software. It also synchronizes video depositions with transcript text, allowing users to search and locate key passages and increase the impact of key testimony.

For more information, or to download a free, 30-day trial of TextMap5, visit www.lexisnexis.com/dots.

Disaster Deterrent

Case Central Unveils E-Discovery Business Continuity Planning Protocol

Corporate counsel and law firm software provider CaseCentral has announced the availability of its e-discovery business continuity planning (BCP) protocol.

Building on CaseCentral's enterprise-class e-discovery disaster recovery protocol, which was implemented in July 2008, the set of rules and features was designed to ensure that CaseCentral's e-discovery customer data survive a disaster, and that service to clients is maintained. The BCP protocol ensures that clients will avoid a "ghost ship" scenario in which systems continue, but core business processes fail.

To safeguard client e-discovery data and minimize potential downtime and data loss for all clients, CaseCentral has invested in and deployed a fully operational, secondary data center in a location separate from its primary production data center.

For more information, visit www.casecentral.com.

Time Management

MonetaSuite Software Quantifies High-Value Workers' Activities

Productivity solutions provider Bottom Line Time recently launched MonetaSuite, the company's flagship

software product family that intuitively and seamlessly tracks, tags and reports the time that high-value workers spend in e-mail and other productivity applications.

MonetaSuite's applications work in the background, tracking tasks and allowing users to work without interruption. The software provides accurate information about users' work activities and can help firms figure out how to best deploy human resources and track client or internal cost accounting and cost recovery.

Bottom Line Time's first product, MonetaMail, automatically tracks e-mail activities in Microsoft Outlook by client and/or project code. The next product, MonetaDocs, will track time spent in Microsoft Office applications.

For more information, or to purchase the software, visit www.monetasuite.com.

Safety Supplement

Review Platform Addition Enhances Risk Mitigation Capacity

Business process solutions company Anacomp Inc. has unveiled CaseProduction, a new module to CaseLogistix, Anacomp's litigation review platform. CaseProduction augments the litigation review, cost reduction, and risk mitigation capabilities that CaseLogistix – which lets legal teams collect, organize, review, analyze, and produce digital evidence using an interface similar to Microsoft Outlook – currently offers.

CaseProduction offers robust capabilities for native file, image-based or mixed productions, image endorsements – such as adding redactions or confidentiality statements – and high-volume metadata export into any format requested by opposing counsel, regulator, or administrative body for review. CaseProduction also simplifies processes and reduces costs by utilizing pre-flight checks to minimize last-minute course corrections and mitigates risks through consistency, accuracy and creating the right output in the right format.

For more information, visit www.anacomp.com/clx/caseproduction.

Case Management Made Easy

Lextranet 5.8 Helps Attorneys to Manage Video Depositions

Merrill Corporation, which provides business communication and information management services for the legal profession, recently released Lextranet 5.8, the newest edition of its litigation case management solution.

Version 5.8 includes new tools to manage and search video depositions for keywords and a text compare feature that enables legal teams to quickly and accurately assess the differences between near-duplicate documents.

The Lextranet case management system provides a secure, Web-based environment for multiple parties to quickly search, organize, evaluate and share litigation-related information throughout the case life cycle.

For more information, visit www.merrillcorp.com.
