OneLessDesk: Sleek, New Space Saver

Tight on space but don't want to sacrifice style in your firm? Checkout OneLessDesk™, a new workstation constructed entirely of welded, thick, stainless steel, sporting a gorgeous non-directional brushed finish. OneLessDesk's upper deck can easily support the size and weight of two 24-inch flat-panel displays. OneLessDesk's lower deck is no mere keyboard tray. Its 12-inch by 30-inch work surface provides space for your keyboard, mouse, pen, tablet ... even paperwork. And the lower deck's height is ergonomically correct, which means you'll look good and be comfortable while you work. The stainless steel OneLessDesk is a new premium, limited edition product. The mass produced OneLessDesk is coming soon, will have a much lower price tag, and be available in several colors.

GBC Shredders Eliminates Frustrations

GBC® ShredMaster® shredders feature a full range of power for multiple document capacity resulting in increased productivity and product reliability. There are more than 10 different models in the ShredMaster 3000-7000 series. With several document capacity options available, office users can select a GBC model built for department, multi-department, or large capacity/production needs. According to a recent survey, 37 percent of users thought that their current shredders did not handle enough pages at one time. With 46 percent of office workers shredding documents on a daily basis, the lack of shredding capacity adds up to a lot of frustration.

Capacity and power combined with contemporary design make the GBC ShredMaster 3000-7000 series shredders a much needed response to the demands of today's workplace.

Command on Demand

NaturallySpeaking Software Types as You Talk

Dragon NaturallySpeaking Legal 9 enables legal professionals to create and edit contracts, briefs, and e-mails, all by speaking. It has never been faster or easier to use, and it's accurate – up to 20 percent more accurate than the prior release. Talk to your computer and your words instantly appear in the full Microsoft® Office® Suite, plus Microsoft Internet Explorer, Corel® WordPerfect®, Lotus® Notes®, and virtually all other Windows®-based applications. Dragon NaturallySpeaking Legal 9 also automatically formats legal citations.

Sizzling Software

Software Technology Upgrades Products, Introduces HotBackup

Software Technology, Inc. (STI) released Version 14.3 of its billing, practice management, and financial software products. The Client Server Version (CSV) of the 14.3 release introduces HotBackup, a feature that allows firms to back up their data while others continue to work in the software. Additionally, CSV includes new Accelerators which significantly decrease the processing time of reports and statements. CSV offers an auto-recovery feature enabled by transaction processing technology, which helps to ensure that data is kept safe, minimizes corruption, and can greatly reduce downtime.

"HotBackup allows firms to schedule regular backups throughout the workday while people continue to work within the software, which offers greater convenience and peace of mind knowing that you have a backup that is only a few hours old," said Dan Berlin, President of STI (maker of Tabs3 Billing Software and PracticeMaster Practice Management Software).

One Size Fits All

Kodak Scanner Accommodates Array of Document Sizes

The compact Kodak Scanmate i1120 Scanner quickly and easily transforms data from paper documents into usable digitized information to help legal professionals improve customer response time, organize document files, and increase overall efficiency. A built-in "smart touch" feature delivers intuitive operation making everyday scanning as simple as pressing a button. Users may scan to e-mail, printers, or other desktop applications and in a choice of file formats including searchable PDF. Bundled software offers flexibility and capability in capturing, managing, and retrieving information.

"This scanner offers Perfect Page Image Technology that can make scanned images look better than the originals, has the quickest scanning speed, and is the only one in the category that handles document sizes ranging from business cards to long-length legal and loan documents," said Tony Barbeau, Director of Scanner Business, Document Imaging, Kodak's Graphic Communications Group.

Simple Sorting

Smead Labeling System Eases Filing

Find files faster with the new Smead Viewables 4.0 Color Labeling System. Recently updated with an expanded line of colors and fonts for customized labels, updated technology, and user-friendly templates, Viewables 4.0 makes labeling simple, saves time, and eliminates the stress of searching for important documents.

"Viewables 4.0 is now more intuitive while offering greater design choice," said Jim Riesterer, Smead Vice President of Marketing. "With the new upgrades, it is now easier than ever to create a personalized filing system that greatly reduces the amount of time spent looking for documents."

Clear label protectors prevent soiling and reduce wear and tear to extend tab life.

For more information, visit www.smead.com.

Find files faster with the unique 3-D design of the Viewables labeling system, which allows files to be viewed from the top, front, and back. A PC and printer produce unique wrap-around color coded self-adhesive labels which fasten easily to standard file folder tabs or the patented three-sided Viewables folder tabs.

PDF Possibilities

New Version of WordPerfect® Includes PDF Suite

Corel Corporation released Corel® WordPerfect® Office X4, the latest version of the alternative to Microsoft® Office. WordPerfect Office X4 combines all of the features that WordPerfect Office is known for while breaking new ground as the world's first PDF office suite. Offering a full range of PDF capabilities, WordPerfect Office X4 makes it easy for users to import, edit, and export PDF documents – including scanned PDFs – dramatically simplifying user workflows and reducing the need for third-party PDF software.

"With WordPerfect Office X4, we wanted to deliver an office suite that enables users to more effectively communicate their ideas and achieve their best results," said Jason Larock, Director of Product Management for WordPerfect Office. "WordPerfect Office X4 builds upon the unique strengths of WordPerfect, adding more PDF capabilities, more Microsoft Office compatibility, and new tools for collaboration, digital note taking, and business intelligence."

Snail Mail Solution

Neopost's New Series Saves Time

Neopost introduced the IS Series of intelligent systems that helps meet mail room needs. Offering state-of-the-art technology and online services, these inclusive solutions deliver enhanced productivity and sleek, ergonomic designs that are easily integrated into the business environment. Easy to operate and convenient to use, the IS Series machines are fast and efficient. With the ability to "Load 'n Go," manual sorting is eliminated as envelopes of various sizes and formats can be placed into the mixed-size, self-aligning feeder. Once the start button is pressed, mail is sorted by size, thickness, and weight; processed; and automatically sealed at up to 150 letters per minute.
