

InPractice Medical Record Review in *Minutes*

InPractice is AI medical record review software purpose built for personal injury, workers' comp, medical malpractice, and other medical record-intensive cases. Upload records. Get a case-ready chronology and summary in minutes. Then ask Case Chat anything: every answer pulls from the case file and links to the source page, so you can verify any fact in seconds.

Why InPractice?

Save Time & Money

Review records in minutes, not days.
1,000 pages processed in under an hour.

Gain Insight

Summaries surface the medical facts
your case turns on.

Stay in Control

Edit, filter, and export results the way
your firm works.

Transparent Pricing

Pay-as-you-go pricing with no
subscription or per-user fees.

Trusted Business Partner

Already relied on by hundreds of firms
nationwide.

Medical Record Specialization

We do one thing — medical record
review — and we do it best.
