The Association of Legal Administrators (ALA) is an international organization representing more than 8,000 professionals who manage such areas as operations, human resources, marketing, accounting and finance, information technology services, and support. Members engage in the administration of private law firms, corporate legal departments, government and nonprofit agencies. ALA continually strives to provide members with information on current practices in the areas of compensation and benefits, thus helping them plan for the future.

ALA thanks the members who provided feedback and welcomes future suggestions about how to improve this valuable annual survey.

The 2017 ALA Compensation and Benefits Survey report provides:
Annual base salary and total compensation data for 58 individual management positions.
Wage and bonus information for legal secretaries/administrative assistants and legal assistants/paralegals.

Information on the benefits offered to and covered by the organizations for the positions surveyed.
Demographic information that is used to break out the survey results by organization type, number of lawyers/judges, supervisory responsibility, years experience, education, region/country, state/province, and metropolitan area.

The capturing of demographic data is important, not only to identify who is represented in the survey, but also to distinguish differences in compensation and benefits among various breakout groups. using these breakouts, members are able to compare their organization's compensation and benefit package to the overall progression, to organizations similar in size, and to those within the same geographic area.

Overall, 934 usable questionnaires were returned by the final cut-off date and are included in the results. This represents a response rate of approximately $16 \%$ when compared to the 5,911 locations represented by ALA's 8,213 U.S. and Canadian members. The consolidated results encompass data for 9,322 professionals, with additional hourly wage data for 7,129 legal assistants/paralegals, and 15,802 legal secretaries/administrative assistants.

## METHODOLOGY

An invitation to participate in an online questionnaire hosted by iLumen was sent on June 22,2017 to 8,213 U.S. and Canadian ALA members. The email explained the objectives of the survey and encouraged member participation. Email reminders were sent by ALA to non-respondents in July 2017.

ALA members who did not participate in the 2015 and 2016 surveys were provided with a way to register for the survey. Once they registered, an email with the link to the online questionnaire was sent to them.

Respondents were asked to forward the link to the online questionnaire to the individual in their organization who was best equipped to provide accurate information. One questionnaire was completed for each location. When providing compensation data, respondents were instructed to report the annual compensation employees received for the 12 months ending March 31, 2017. If there are more than one person at a postion, firms were advised to average the compensation for all incumbents. U.S. locations reported in U.S. dollars and Canadian locations reported in Canadian dollars.

## Data Processing

Before analysis began, responses were edited for inconsistencies, errors and obvious outliers were removed. Survey data were then cleaned and tabulated. This report was prepared by iLumen Inc.
